Advanced Mare Reproduction (featuring Placentitis & Foetal Sexing) - A 2-Day Practical Course

New Program
in Australia

21 - 22 March 2020

Lectures: Hawkesbury Leisure & Learning Centre, Richmond (Sydney, NSW, Australia)
Wetlabs: Agnes Banks Equine Clinic Agnes Banks (Sydney, NSW, Australia)

Early Booking Discount Deadline: 9 February 2020

This two-day practical course (now featuring Placentitis and Foetal Sexing) has been developed for equine veterinarians and mixed animal practitioners with a working knowledge in the field of equine gynaecology (mare reproduction) and provides a critical update on topics of relevance to mare reproduction practice. Whereas previous VetPD Advanced Mare Reproduction courses in Australia focussed on artificial breeding, the emphasis on this course will shift to more general equine stud practice and highlight the hot topics of placentitis and foetal sexing.

In the afternoons, 7 hours of practical sessions (including live horse wetlabs, video and case discussions) will give attendees plenty of opportunity to put theory into practice in small groups (2-4 attendees / ultrasound machine) and to discuss all aspects of gynaecology with the specialists. Practical workshops will cover: ultrasound examination (incl. doppler), hysteroscopy, placentitis (transrectal and transabdominal examinations), uterine sampling techniques update, foetal sexing (transrectal and transabdominal examinations).
