

Get a **\$430 discount***
by using this Voucher Code: **20BCF637**

*BCF Ultrasound extends a limited number of course spaces at 20% discount (off the full price, not cumulative with Early Bird or other discounts) on a first-come first-served basis to its valued clients. Pay only \$1720 AUD instead of \$2150 AUD by entering the above code during registration on the VetPD website.

Back, Sacroiliac & Pelvic Problems of the Horse - A 2-Day Practical Course

30-31 May 2020

Venue: Camden Equine Centre, University of Sydney Camden Campus (Camden, NSW, Australia)

Early Booking Discount Deadline: 13 April 2020

Conditions affecting the back, pelvis and sacroiliac region are common in the horse and can cause pain, poor performance and lameness. Over the past decade the axial skeleton has been extensively researched; this new knowledge combined with recently published retrospective studies have shed light on these previously poorly understood problems. This 2-day highly practical course is suitable for veterinarians from mixed and equine practice who are keen to update their knowledge on the pathophysiology, clinical presentation, diagnosis and up-to-date therapy of back, pelvic and sacroiliac problems in the horse. This course was designed to maximise the learning experience for all attendees with **7 hours of practical sessions** in small groups (**2 – 4 vets / ultrasound machine**) on live horses & equine specimens covering the Examination technique of the back & pelvis, Ultrasound of the back (incl. facet joint injections), Saddle fit assessment, Sacroiliac injection techniques and Ultrasound of the pelvis & hip.

This course is returning to Australia by popular demand. The 2017 course was a sell-out. Avoid disappointment in 2020 and book early!
