**You will pay \$1610 AUD instead of \$2150 AUD** by entering the above voucher code during registration on the [VetPD website](#).  
Sponsor Discounts are NOT cumulative with Early Bird Prices or '2<sup>nd</sup> vet same practice' discounts.

### 2-Day Wetlab: Hindlimb Lameness Diagnostics (incl. Objective Lameness Evaluation) & Therapies South Eastern Equine Hospital, Narre Warren North (near Melbourne)

**JUNE 2019**

**1 - 2**

**MORE DETAILS**

This two-day practical course has been developed for equine veterinarians who have experience with lameness investigations and provides a critical overview of possible causes of hindlimb lameness, diagnostic anaesthetic strategies and how to interpret nerve and joint block results, via a regio-anatomic approach. Discussions on the upper hindlimb as a cause of lameness (hip joint, pelvic and sacroiliac problems), objective lameness evaluation and on systemic and intra-articular joint therapies will round the course off.

In the afternoons, **7 hours of practical and case-based sessions** will give attendees plenty of opportunity to put theory into practice on live horses and limb specimens in **small groups (2 – 4 people per ultrasound machine)** and to discuss all aspects of Hindlimb Lameness diagnostics and therapeutics with the specialists. Each attendee will be rotating through the following practical stations: Subjective lameness examination; Objective Lameness Evaluation (Equinosis Q – Lameness Locator); Nerve & joint blocks (incl. ultrasound-guidance); Ultrasound of the metatarsus, tarsus or stifle joint (region chosen by each group individually); 2 hours of live horses/clinical cases evaluated via subjective and objective lameness evaluation.

#### SPEAKERS:
